Quality, security and durability

TRIMETALS
secure outdoor storage

celebrating
50 YEARS
Est. 1967

Trimetals has been established for over 50 years and is widely acclaimed as Europe's leading producer of quality metal storage products.

At Trimetals we design, manufacture and supply metal storage buildings featuring unique innovative designs and unsurpassed quality. All products in our extensive range are maintenance free, fire resistant and have been tested for optimal strength, durability and security.

The only metal sheds and storage endorsed by the RHS

Our premium products and long standing reputation have been

recognised by the Royal Horticultural Society; we are delighted to be the first and only company to have its metal sheds and storage endorsed by the RHS.

Trimetals sells its products worldwide, supplying Europe, Australia, Japan, South America and the USA. Our substantial export achievements have resulted in us being presented with the most prestigious business honour – The Queen's Awards For Enterprise: International Trade. We are continuing to significantly increase our exports as demand for our products grows internationally.

Our company has over 50 years of experience in designing and manufacturing the finest metal sheds and stores using the highest quality materials.

Do not confuse our products with cheap mass produced metal or plastic sheds which can be flimsy, easy to break into and will rust or become brittle over time.

If you require premium quality, security, years of trouble free use and peace of mind you will not be disappointed with any Trimetals product you select.

How people are using Trimetals

There's a whole a-z of uses for the super robust and secure Trimetals storage range and they are an essential part of life for all sorts of people and all sorts of places – from keen cyclists, gardeners and mobile home owners to international airports, major football clubs and thousands of schools.

Our products look and perform like no other. We have over 50 years of expertise to draw upon, allowing us to design and manufacture a premium quality range featuring modern, clever and unique patented designs.

All our storage buildings are produced in the UK from a PVC coated galvanised steel which offers

tough protection against both thieves and the weather; this special material is also maintenance free and fire resistant.

A huge range of styles and sizes is available, from compact patio stores to garden sheds large enough to store ride-on garden machinery; unique and specialised storage for bicycles and motorcycles is also offered, from basic models up to those featuring the preferred police specification.

Whatever your storage requirement we have the answer – so don't buy problems, buy Trimetals.

As supplied to:

- Gardeners
- Landscapers
- Airports
- Hospitals
- Premiership football clubs
- Mobile home sites
- Golf clubs
- Building companies
- Over 4,500 UK schools

We are also major exporters to Europe, the Far East and the USA.

Strong, secure and maintenance free

All Trimetals buildings and stores are precision manufactured from modern PVC coated galvanised steel, which is approximately 50% thicker with twice the paint thickness of most comparable products.

This material does not require any maintenance and it is also fire resistant, with a 25 year guarantee against corrosion; a high quality product giving many years of trouble-free service.

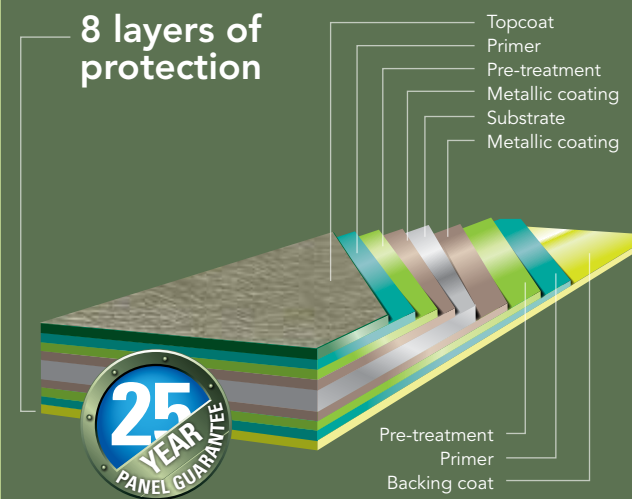

We have chosen either stainless steel or aluminium for all exterior fasteners to ensure our products look and perform at their very best.

Security, in addition to good looks and functionality, has also been carefully considered, with all products in the range featuring either secure padlock points or a handle operated bar locking system (or a combination of both). We also use special lock nuts on all accessible bolts, which stops any fasteners being removed from the outside.

Trimetals has been designing and manufacturing in the UK for over 50 years; we are approved to Lloyds Quality Assurance (ISO 9001) and have supplied many hundreds of thousands of storage buildings all over the globe.

Contents

Trimetals uses a special PVC coated galvanised steel for panels. This material is guaranteed for 25 years and is both maintenance free and fire resistant. Trimetals buildings have a replacement guarantee against rust perforation on all undamaged PVC coated panels.

Terms and conditions are available on request.

Fire resistant

To conform to National Building Regulations and restrictions on mobile/holiday home parks, the panels used on all Trimetals buildings have been approved to the following standards:

Class 0: Fire rating in accordance with tests carried out to BS476: Part 6 (Fire Propagation)

Class 1: Rating Part 7 (Surface Spread of Flames)

A Certificate of Fire Conformity is available on request and supplied with each product.

Trimetals Metal Sheds

The only
metal sheds
and storage
endorsed by
the RHS

Our range of Titan metal sheds is unique. The design, strength and quality are unmatched by any other manufacturer. So whatever you need to store outside, Trimetals has a secure metal shed that will protect season after season.

Vents

Included to allow free flow of air

Quality Fixings

Exterior stainless steel fixings

Window

One acrylic window as standard
(option of two windows or no windows)

Hinged door

Stainless steel hinges
(option of double doors)

Lock

Key operated that bolts to both
top and base of door

Material

PVC coated galvanised steel

Wooden Floor

Optional 18mm exterior grade floor

Ramp

Integral ramp to allow easy storage

Apex roof

Titan 960 - Pent roof

An excellent range of both Apex and Pent Roof sheds, combining modern benefits but still keeping a traditional appearance.

All feature hinged doors, a key operated locking handle which secures a dual bolting mechanism and a exceptionally rigid and solid construction.

A wide selection of accessories is available including benching, shelving, wooden floors and different window configurations.

Simple assembly is achieved by utilising precision manufactured panels; our sheds are available in a selection of sizes to suit any garden.

“ We are so pleased and proud of our shed – already our neighbours are drifting in to have a look. A good slogan for Trimetals would be ‘See the best – forget the rest’. ”

Mrs W – Dorset, UK

Vents

Included to allow free flow of air

Stainless steel exterior fixings

Stainless steel hinges and exterior fixings

Wide double doors

Easy access

Lock

Key operated that bolts to both top and base of door

Ramp

Integral ramp for easy access

Our largest shed, the Titan 108 is supplied in an attractive two tone green, it features double doors as standard and two windows. It is perfect for larger gardens and ideal for the storage of ride-on garden machinery.

Siting

There are various ways in which our buildings can be sited, concrete bases or paving slabs are both options but there are also other alternatives. To help decide which option is best for you please visit our website where we feature a number of illustrated suggestions.

Optional accessories

Windows

The Titan 108 is supplied with two windows as standard which are positioned next to the doors. As an option this shed can have an additional two windows fitted to the rear of the shed (giving a maximum of four windows) or, for security, no windows at all.

The Titan Pent roof models (940, 950, 960) have no windows. The Titan Apex sheds (630, 640, 660 and 680) come with one window as standard which can be fitted either side of the door. As an option these sheds can have an additional window (so there is a window each side of the door) or, for security, no windows at all. If you choose double doors as an option you cannot have any windows fitted.

Shelving & benching

Two-tier shelving and benching are available for all Titan models.

The shelving is fixed to the shed frame and the benching is freestanding. Shelving dimensions (two-tier): 69" (1752mm) long x 8" (203mm) deep. Benching dimensions (two-tier): 33" (838mm) high x 15.5" (394mm) deep with length depending on Titan model from: 43" (1092mm) to 86" (2184mm)

Wooden floor

High quality wooden floors are available for all models and are supplied with metal floor supports.

Hasp & padlock (Pent roof models only)

These quality hasps and padlocks are constructed from stainless steel and brass for long life, and can be incorporated onto all Pent roof buildings for even greater security. They secure both doors and are an extra visible deterrent to thieves or vandals, especially if your building is used to store more expensive items, such as motorbikes or bicycles (see photograph). The hasp is used in addition to our normal keyed bolting mechanism, which is standard throughout the range.

Alarm

Key pad operated infra-red movement sensing alarm with loud (130db) siren comes complete with unique fixing bracket for easy installation. **Note:** Batteries not included.

Roof style

The 940, 950 and 960 are Pent roof style – all others are Apex.

Metal Sheds – Technical information

108 (approx 10'x8')	7'9"	9'9"	7'3"	4'7"	9'3" x 11'3"

The door height on all models is 1740mm
***With double door option width is 1395mm (4'7")**

Note: The above sizes are internal – allow 150mm extra for **external** length and width measurements.

Colour options: Titan Sheds can be supplied in a choice of all Olive Green or two tone Olive / Moorland Green; however the Titan 108 is only available in the two tone option.

Trimetals Storage Units

The only
metal sheds
and storage
endorsed by
the RHS

Our comprehensive range of storage units has proved immensely popular for both garden and general home use. They offer an excellent alternative or addition to a conventional shed, especially where space is limited and due to their low profile and attractive designs, can be sited almost anywhere.

Quality Fixings

All fixings are stainless steel

All aluminium hinges and rivets

Easy to use

Spring assisted opening action

Lockable

Lockable – to two padlock points

Floor

Choice of optional 12mm exterior grade wooden floor or galvanised steel metal floor

Storeguard

Storeguard

The No.1 and still the best - our uniquely designed garden stores have proved hugely successful, having sold many hundreds of thousands of units worldwide.

The ingenious patented opening mechanism is light and easy to use and allows complete access to stored items.

Maintenance free construction and superb quality ensures many years of trouble free use.

Securely lockable via two padlock points and available in a wide range of sizes.

“ I would give the product a 5 star rating. Original purchase made several decades ago and now followed by another two of the same. ”

Mr. T – Wales, UK

Optional accessories

1 Floor

All storage units can be supplied with a choice of ½” (12mm) exterior grade plywood floor (see picture 1) which raises the contents of the unit 3” (75mm) above ground level – the floor is simply placed on a base frame within the unit or alternatively a ground level metal (galvanised) floor (see page 20).

2 Hasp & padlock

For even greater security this high quality lock set also secures the unit's front door to the base. Both hasp and padlock feature a stainless steel and brass construction for long life. One or two sets can be fitted as required.

3 Padlocks

These top quality solid brass padlocks feature a hardened steel shackle and come complete with two keys and a five year guarantee. Two padlocks are recommended.

4 Shelving

Our adjustable staged shelving sets are ideal for organising small items, ensuring you get the maximum benefit from the storage space. The Storeguard can hold two shelving sets and the Stowaway one set. Shelving is not available for the Sentinel.

Information

Colours

All models are available with moorland green side panels and olive green roof/door. The Storeguard, Stowaway and Bicycle Store are also available in cream or anthracite.

Siting

There are various ways in which our buildings can be sited, concrete bases or paving slabs are both options but there are also other alternatives. To help decide which option is best for you please visit our website where we feature a number of illustrated suggestions.

A clever patented spring-assisted opening action allows complete and easy access to your cycles and, when closed, the unit benefits from two padlock positions as standard, or up to four locking points with the use of our optional hasp and padlock sets. For increased security, this unit is also designed to be bolted down (from the inside) onto a hard base, which prevents the store from being lifted.

The Bicycle Store is produced from a special PVC-coated galvanised steel, which is totally maintenance free and fire resistant. It is also guaranteed against corrosion for 25 years.

Tested and recommended by the UK's leading cycling magazines, the standard Bicycle Store has the height and width to accommodate all types of mountain or racing bike and, depending on the design of the cycles, can accommodate up to three.

Bicycle Store

“ This is what we
have been waiting
for – clever design
and easy to use. ”
Mr O – Tokyo, Japan

Secure Cycle Store

Designed with all serious cyclists and mountain bikers specifically in mind, the Trimetals **Protect-a-cycle** store boasts all the excellent benefits of our standard Bicycle Store but has many extra features to make it ultra secure.

Certificate No. 899c
Approved to LPS1175:
Issue 8 Security Rating A1

First and only bicycle store to achieve the police SBD mark

The Protect-a-cycle is the only bicycle store in the UK to be awarded the coveted Loss Prevention Certification Board and Police Preferred Specification stamps of approval.

To achieve these awards, the Protect-a-cycle was put through a series of rigorous tests to confirm its amazingly tough resistance to vandalism and theft.

This impressive cycle store comes as a package with an integral metal floor and ground anchor, exceptionally strong metal hasps and padlocks, and a heavy-duty security cable for attaching bikes to the store internally.

Now available
with a hinged
front ramp.
See pages
23-24

Protect-a-cycle Store

“Thanks very much for my new Protect-a-cycle – I love it and wish I had it years ago. I’m going to go out and buy a new bike to celebrate it!”

Mrs M – Sydney, Australia

Protect-a-cycle Store

Official Police Security Initiative

SBD Approved - this product meets all the requirements detailed in the current Secured by Design Homes Guide and therefore allows planning authorities and developers of new builds and refurbishment schemes to achieve full Gold or Silver security awards for their projects.

- Easy to use
- Integral metal floor
- Ground anchor
- Three heavy duty padlocks and hasps
- Internal security cable
- PVC coated galvanised panels
- Protects in all weathers
- 25 year panel guarantee
- Stores up to three adult bikes
- Quality build
- Easy assembly
- Simple instructions
- Maintenance free
- Fire resistant
- Choice of colours

Magazine tests

“Robust enough to deter anyone breaking in and is a sound investment. It is easy to assemble, unobtrusive and can store bikes and kit with room to spare; this product is Highly Recommended.”

“The best reflection of a cyclist’s opinion about any product isn’t what they say about it or whether they’d happily use it, it’s whether or not they’d buy it with their own money. I purchased three Protect-a-cycle bike stores for my own bikes. They’re sturdy, weatherproof, secure, and take up little space.” - Dan Joyce, Editor.

Best available for the money – SUPERB PRODUCT.

Protect-a-cycle products must be bolted down onto a concrete base, they are shown on paving slabs for the purpose of photography only.

Secure Cycle Store with Ramp

We now offer both our Bicycle Store and Protect-a-cycle with the option of a hinged front ramp. This allows easier access to cycles and is especially useful when storing electric bikes which are considerably heavier than standard versions.

With the increasing popularity of electric bicycles, which can be heavy to store, we offer the option of a convenient hinged front ramp. This clever patented design simply drops down when access to cycles is needed and then folds back into position to form the lower base.

A high quality one piece aluminium plate is used for the ramp which ensures both high strength and easy operation.

Reinforced metal hinges are incorporated along the length of the ramp which is designed to support the weight of a cyclist and their cycle. The ramp does not reduce the interior space of the product and depending on cycle design can still store up to three adult bikes.

Cycle Store with Ramp

“All installed, very clear instructions and easy to assemble.”

Mr C – Dublin, Ireland

For additional security, when the ramp is in its upright position it locates behind the front door so cannot be accessed without opening the unit first. In addition, the ramp can be padlocked to the door through the integrated stainless steel hasps. The ramp option can be used with any colour of bicycle store or the high security Protect-a-cycle version.

See page 22 for colour choices.

Can be supplied in many other colour combinations subject to minimum order quantities.

The Sentinel LPG features a front door panel which extends to the base

Trimetals Gas Cylinder Storage

The Trimetals Senturion range of LPG cylinder stores has been designed and manufactured in the UK to meet the current Codes of Practice as specified by the LP Gas Association (which adopts the recommendations of BSI, CEN and ISO) and conform to the British Standards associated with these Codes of Practice.

We supply five models within our Gas Cylinder storage range. The Senturion 247, 447 and 151319 have an integral metal base and a removable lower front panel (see illustration) which allows for the easy changeover of cylinders. All products are lockable via padlock points and have different methods of operation depending on model.

Compliance information

- 1 BS5482: Part 1 2005 (Code of Practice for Domestic Butane and Propane gas burning installations).
- 2 BS476-22: 1987 (Fire Resistance of materials used in product construction).
- 3 LP Gas Association Code of Practice 24: Part 1 - Use of LPG Cylinders: Use of LPG Cylinders at Residential and Similar Premises (July 2006).
- 4 LP Gas Association Code of Practice 7 - Storage of Full and Empty LPG Cylinders and Cartridges (March 2004).
- 5 Class 0 and Class 1 (Fire Rating materials used in product construction).

071513

The 071513 has a hinged lid which can be padlocked shut if required

Fire resistant

All models are produced from a fire resistant PVC coated galvanised steel, which conforms to both Class 0 (in accordance with BS476: Part 6 and 7) and Class 1 fire ratings. This material is also maintenance free and guaranteed against corrosion for 25 years.

Ventilation

Our gas cylinder stores have been specifically designed to provide the correct level of ventilation. Our products feature vents at both high and low levels which is critical when storing LPG cylinders.

Safety labels

Approved safety labels are supplied with each product.

Location information & conformity declaration

All products are supplied with detailed technical information such as location advice and a written declaration that they conform to all current British Standards/Codes of Practice. This can be shown to Fire Officers or Gas Appliance installers, to confirm the products are suitable for use.

Main features

- Safety label (supplied)
- High level ventilation
- Fixing holes for regulator/changeover valve
- Easy opening action
- Protected pipe exit hole to prevent chafing
- Secure padlock points
- Removable lower front panel
- Fire resistant PVC coated galvanised steel panels
- Low-level ventilation

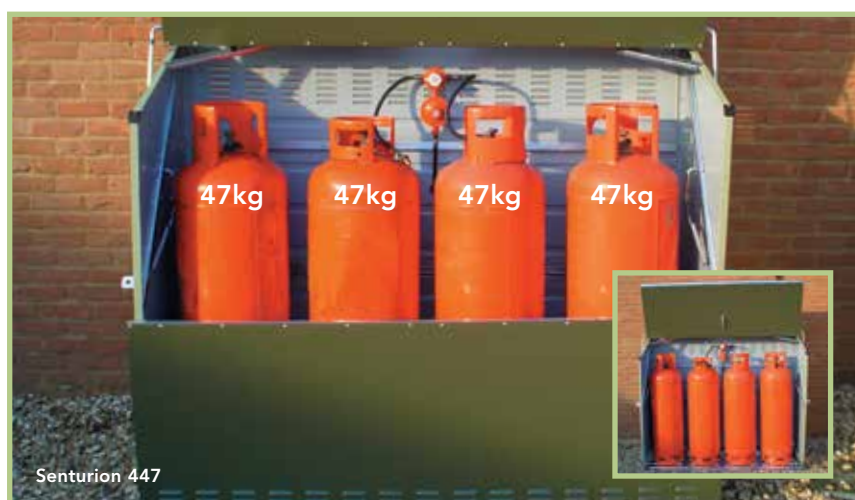

Senturion 247

Senturion 247

Official supplier to:

Recommended by Antargaz the leading supplier of LPG in France

Senturion 447

The 247, 447 and 151319 models have a removable lower front panel.

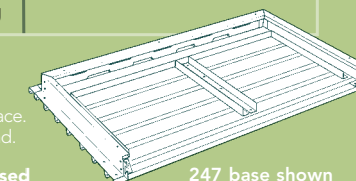

Unit dimensions

Model	Height	Width	Depth	Weight	Cylinder storage capacity
247	62" 1570mm	44" 1120mm	27" 690mm	49kg	2 x 47kg cylinders
447	62" 1570mm	77" 1960mm	27" 690mm	75kg	4 x 47kg cylinders
Sentinel LPG	39.5" 1000mm	43" 1090mm	26" 660mm	29kg	2 cylinders up to 19kg each
151319	39" 980mm	30" 760mm	19" 480mm	23kg	2 cylinders up to 19kg each
071513	28" 720mm	27" 695mm	17" 430mm	10kg	2 cylinders up to 13kg each

Integral metal base

The 247, 447 and 151319 models feature an integral metal base, which is designed to be bolted down onto a hard surface. Cylinders within the Sentinel unit rest directly onto the ground.

IMPORTANT: Our gas cylinder stores are *not* to be used within a building – they are intended for exterior use only.

Guardian Shed Range

A new and exclusive range of superior quality, modern style, metal storage buildings from Japan. Precision engineered from modern Galvalume (aluminium zinc protective coating) steel. A compact and functional storage solution. Ideal for general garden use, tools and ladders, sports, fishing and golf equipment and cycles.

Material

Modern Galvalume Steel
(aluminium zinc protective coating)

Lock

Key lock – supplied with two keys

Shelving

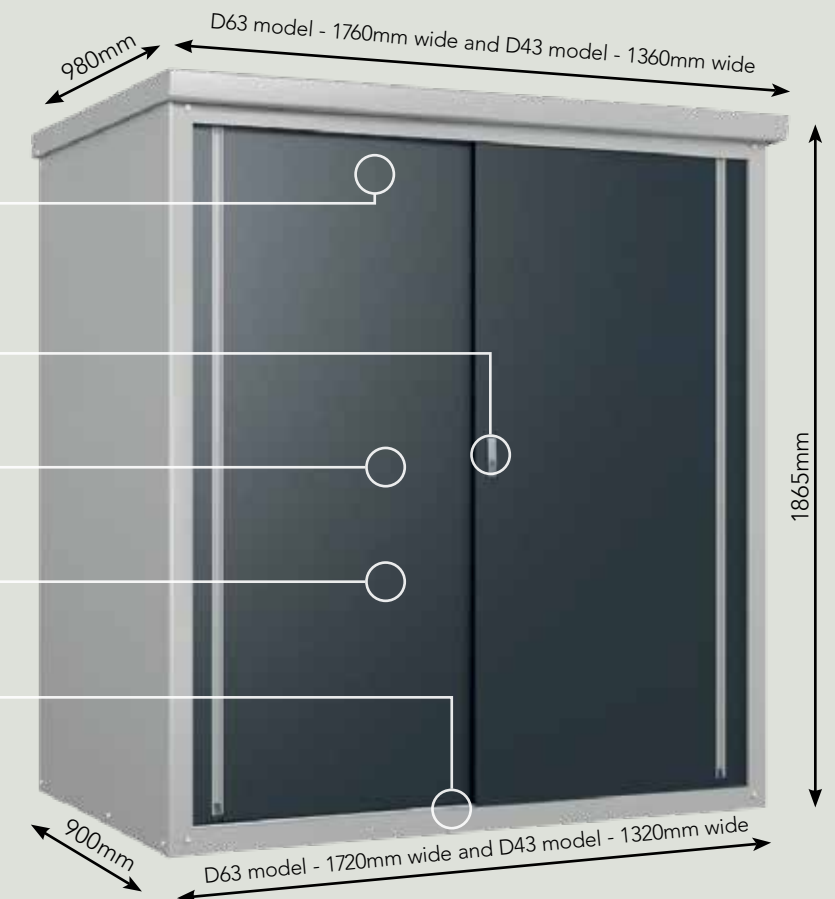

Customisable shelving configurations

Sliding Doors

Smooth sliding door

Integral Metal Floor

Items are stored above ground level

Guardian D63 and D43

“Very good, sturdy and secure storage for my gardening tools.
Mr. B - Lucerne, Switzerland”

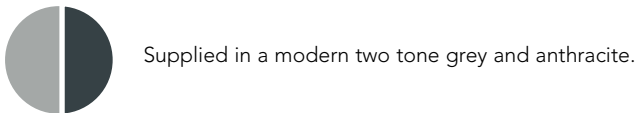

* Additional shelving sets (two shelves per set) can be purchased allowing a maximum of six shelves per shed.

The D63 and D43 feature two lockable sliding doors and come complete with a heavy duty metal floor. Two shelves are supplied as standard and an additional four shelves can be added as optional extras if required.

Dimensions				
Model	Height	Width	Top Depth	Bottom Depth
Guardian D63	1865mm	1760mm	980mm	900mm
Guardian D43	1865mm	1360mm	980mm	900mm

Guardian D33

D33 – single door shed

D33 – single door shed

D33 – single door shed

- Japanese design, quality and engineering
- Two shelves supplied as standard
- Compact and modern design
- Simple, clear assembly instructions
- No maintenance required and fire resistant
- 2 year guarantee on all parts
- 10 year panel guarantee against rust perforation
- Rapid assembly (under one hour)

Light grey/
Anthracite grey

The D33 features a single door which can be hinged either way and is securely lockable. It also includes two shelves as standard and is ideal for smaller gardens.

Trimetals Professional Metal Sheds

Although the Trimetals standard range of Titan sheds is generally regarded as the highest quality and most secure metal sheds available, there can be applications where an even higher specification is required, especially for professional or heavy duty applications.

With this in mind, we have designed this superb new selection, which are the strongest, most secure buildings we have ever produced.

They feature a number of enhanced security features and are manufactured from panels which are approximately 40% thicker compared with our standard range.

A combination of over 50 years' experience, superior materials and modern manufacturing methods have resulted in this new range of Professional sheds which is truly unmatched.

Due to their vastly increased strength and rigidity they are suitable for the harshest environments and offer unrivalled security, making them suitable for the professional gardener or landscaper. They are also ideal for schools, sports clubs, guest houses, pubs or commercial use.

In addition they offer the ultimate in garden security and are highly recommended in exposed areas or where expensive machinery is stored.

The attractive profiled shed panels are made from a special PVC coated galvanised steel which is maintenance free, fire resistant and guaranteed for 25 years against corrosion.

For optimal security a key operated locking mechanism bolts both top and base of the door. This is complemented by a secondary stainless steel hasp and staple which also serves as an excellent visible deterrent.

The new Professional range offers the ultimate in all-round strength and protection, an excellent package at an affordable price.

Optional accessories

Work bench – Two tier galvanised steel work bench (freestanding) – 1638mm long x 838mm high x 394mm deep.

Shelf – Two tier galvanised steel shelf (attaches to side panel of shed) – 1752mm long x 203mm deep.

Wooden floors – High quality exterior grade wooden floors are available for all models, they are supplied with metal floor supports.

Stainless Steel Hasp and staple supplied as standard.

Door location: in 6' side for all Apex models and in short side in all Pent models.

Siting

There are various ways that our sheds can be sited, concrete bases or paving slabs are both options. For more alternatives and illustrations please see our website.

Roof style

All sheds prefixed "AP" are Apex roof style and those prefixed "PP" are Pent roof style.

Metal Sheds – Technical information

Premium Range size chart (metric)

	Length	Width	Height to apex	Door width	Hard base area
AP640 (approx 6'x4')	1314mm	1760mm	2085mm	*685mm	1700 x 2146mm
AP660 (approx 6'x6')	1757mm	1760mm	2085mm	*685mm	2143 x 2146mm
AP680 (approx 6'x8')	2372mm	1760mm	2085mm	*685mm	2758 x 2146mm
PP640 (approx 6'x4')	1760mm	1310mm	2100mm	1160mm	2146 x 1696mm
PP650 (approx 6'x5')	1760mm	1540mm	2100mm	1395mm	2146 x 1926mm
PP660 (approx 6'x6')	1760mm	1760mm	2100mm	1395mm	2146 x 2146mm

Premium Range size chart (imperial)

	Length	Width	Height to apex	Door width	Hard base area
AP640 (approx 6'x4')	52"	69"	82"	27"	5'7" x 7'
AP660 (approx 6'x6')	70"	69"	82"	27"	7' x 7'
AP680 (approx 6'x8')	93"	69"	82"	27"	9' x 7'
PP640 (approx 6'x4')	69"	52"	83"	46"	7' x 5'6"
PP650 (approx 6'x5')	69"	61"	83"	55"	7' x 6'4"
PP660 (approx 6'x6')	69"	69"	83"	55"	7' x 7'

The door height on all models is 1740mm
*With double door option width is 1395mm

Note: The above sizes are internal – allow 150mm extra for external length and width measurements.

Important: All Pent roof sheds (PP) feature double doors; the Apex sheds (AP) are supplied with a single door and no windows as standard, however they may also be supplied with either one or two windows or double doors if required.

Colour: Supplied in Olive green only.

Ultra Secure Cycle Store

With the highest product specification on the market, Protect-a-cycle Pro is the strongest, most secure cycle storage we have ever produced. It is supplied complete with two stainless steel hasps with two high security padlocks and a heavy duty ground anchor (all Sold Secure Silver Approved) with high security chain (Loss Prevention Board tested) to prevent the contents being removed.

Protect-a-cycle Pro's superlative strength and rigidity comes from its extremely robust construction. It incorporates panels that are 40% thicker compared to our standard cycle store and its wider design allows for easy storage of most modern hybrids.

Certificate No. 899e
Approved to LPS1175:
Issue 8 Security Rating B3

First and only bicycle
store to achieve the
police SBD mark

The Protect-a-cycle Pro storage system has been designed to offer outstanding security when the ultimate in cycle protection is required. And it's the only high performance cycle store to have the unique distinction of Secured by Design and Level 2 certification from the Loss Prevention Certification Board which is the independent testing and product evaluation authority.

Protect-a-cycle Pro

Protect-a-cycle Pro

Protect-a-cycle Pro

- Easy to use
- Integral metal floor
- Ground anchor
- Three heavy duty padlocks and hasps
- Internal security chain
- PVC coated galvanised panels
- Protects in all weathers
- Stores up to three adult bikes
- Quality build
- Easy assembly
- Simple instructions
- Maintenance free
- Fire resistant
- Choice of colours

Magazine tests

"Trimetals has a reputation for high quality secure cycle storage. The "pro" version has a particularly hi-quality spec, it is not easy to see how you can keep your bike more secure - unless you ride it all day and sleep with it all night." - Steve Dyster, Editor

"Would soon pay for itself in high risk areas - Recommended." - Dan Joyce, Editor.
